

Water proof

High MVTR

Secure

The range of AsGuard® Exceed I.V. dressings are constructed from a High MVTR film, which allows for excess moisture to evaporate, combined with a laminated non-woven border for securement and enhanced fixation.

'HIGH TACK, SLOW RELEASE' ADHESION

Adhesive technology provides firm fixation, minimising device movement or premature displacement

TRANSPARENT WINDOW

Allows for insertion site monitoring

NON-WOVEN ADHESION

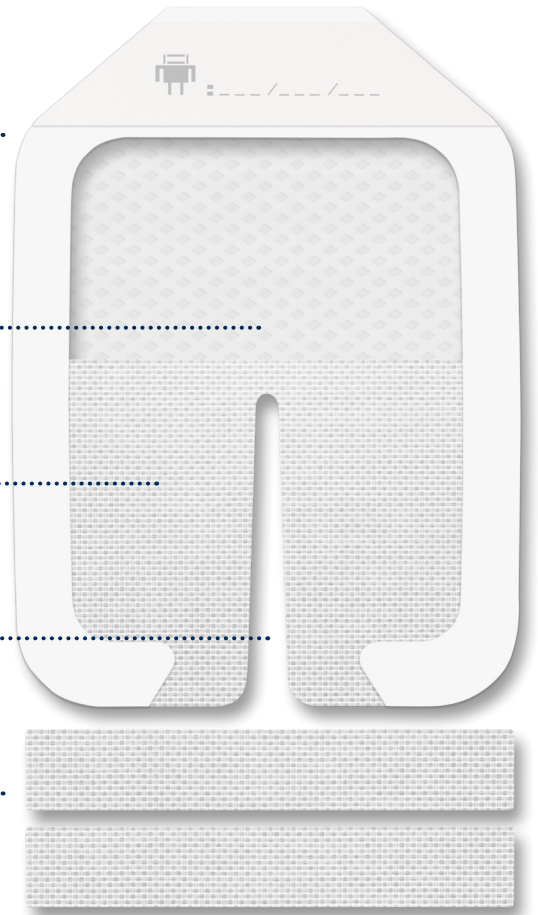

Gentle on skin and reduces edge lifting

DEEP NOTCH

Reduces the risk of dislodgement

HIGH MVTR

Provides environment with optimal moisture management

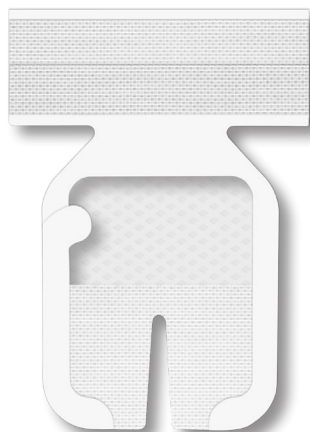

Suitable for:

Protection and securement of PIVC lines
